## SAFETY TIPS

# Leaving the store with your new gadgets

- Do you notice people who are paying more attention to the purchases being made, rather than checking out new products? Report these behaviors.
- If an online tracking system is available for your device, get the extra assistance in the store for setup before exiting the store.
- Don't be distracted as you exit local cell phone stores and other electronic specialty stores that sell these items.
- Be deliberate as you exit these stores, concealing your purchase(s) and focusing on getting to your next destination.
- Try to shop with a friend. Most victims who report crimes that involve snatching new products are people who have shopped alone.
- Never hesitate to point out suspicious activity or people to local officers or security guards. Remember the **"See Something, Say Something"** campaign and dial 9-1-1 if you need an officer dispatched to your location.
