2022 – 1048

# **S.I.R.T. SPECIAL INVESTIGATIONS RESPONSE TEAM**

Monthly meeting on 01/19/22.

Presentation by Detective McGohan on what would be expected on a collision reconstruction scene. Several new members were added to the team from Fort Thomas Police. These members were provided with FARO instructions and provided with a brief overview of what is expected during a call out.

01/30/22 SIRT activated to assist Fort Thomas Police with several scenes in Fort Thomas and Newport. During a vehicle pursuit of a suspected intoxicated driver shots were fired at officers. The driver fired a 9 mm handgun through the windshield of the car he was driving at Fort Thomas Officers. The driver crashed at the Grand/Carothers intersection and was captured after a short foot pursuit.

SIRT members documented the scenes with photographs and FARO scans. Evidence was collected and turned over to FTPD.

01/31/22 SIRT assisted FTPD with search warrant of the vehicle. Photographs and FARO scans taken. SIRT reconstructed the flight path of the rounds fired at officers to show that the driver had intent to injure the officers. The trajectory path showed the rounds were fired from just above the steering wheel at the officers. A final report will be completed.

*Detective Sergeant John Dunn*
